

Solutions

Suction of extruder vapours

LTA - your competent partner for complete applications in the field of air cleaning

Low-maintenance filtration of extruder vapours with plasticizer

Your advantages

- Stable temperature holding for crystal avoidance
- Low maintenance effort! No clogging of the filter
- Very high purity level owing to electrostatic LTA-airfilter in stainless steel construction
- Forwarding of the air over exhaust air chimney to the open
- Optimal price-performance ratio
- Reduction of the running- and energy costs owing to newest technologies and innovations
- By better air-quality raise of the employee-satisfaction and reduction of the risk of respiratory tract diseases which lead to less sick days
