

**Virus Cleaner VC 60 air purifier** to combat viruses, bacteria, pollen and other germs

## Active protection in offices and meeting rooms

The **Virus Cleaner VC 60 actively protects against viruses, bacteria, pollen and other germs** thanks to its unique combination of a highly-efficient electrostatic main filter and an additional HEPA post-filter. The air purifier is ideal for offering customers and employees protection they can trust in meeting rooms, offices and reception areas. The virus concentration, particularly in enclosed spaces, is reduced significantly, limiting the possible risk of infection. The result is a pleasant and healthy room climate, and unpleasant odors are also removed from the air.

The air filter reliably meets all applicable requirements of industry and authorities without compromise. The filtration effect has been confirmed by the Association of German Engineers (VDI) and DIN EN 1822. The Virus Cleaner VC 60 is suitable for removing micro-organisms and biogenic substances and increases trust as an additional safety measure.

Extraction capacity  
*600 m<sup>3</sup>/h*

Collection efficiency  
*≥99.95%*

Room sizes  
*up to 125 m<sup>2</sup>*
